Jean:

I have been informed by the Area Manager - LSC (Ameritech) that the ZPIC value of "A13" and the LPIC value of "9999" both denote Ameritech as the intraLATA toll carrier. The '9999' value is what WorldCom would populate on the LPIC field of the LSR.

Thanks Israel. That's what I thought. Now the ZPIC of A13.....that's just an AIT internal identification, right? I thought all pic numbers were four digit numeric.

Let me know.

Thanks Israel,

Jean M. Smith

Jean:

I have been informed by the Ameritech billing SME that he is almost certain that the 9999 indicates Ameritech is the LPIC, but he says what is more important is the ZPIC. If you see 'A13', as you do in the example below, that *is* Ameritech.

Israel,

This is just a quick question. On looking at the Ameritech CSR database for ANIs, I am just verifying something. On the original list of 25 ANIs that you sent back to me with the PIC information off of the website, the below is an ANI you identified as having the 2pic of AIT.

ACCOUNT: 7084787141

PROCESS-1

Telephone Nbr:	708 478 7141
State:	IL
Class of Service:	PU7
Exchange Code:	MOKN

UJR /PIC MCI /PICX 0222 /PCA BO, 04-16-01 /ZPIC A13  
/LPIC 9999 /LPCA BO, 04-16-01 /TBE A /LCC 1RE /NC SNAL

I just wanted to confirm that AIT's pic number is 9999. Is that correct?

Subject: RE: MM Report on LPIC SWBT and AIT for UNEP Accounts

All,

Just to confuse things more, I just looked up 999 in the North American Numbering Plan website and 999 belongs to WCom. So, I am not sure what you would capture with 0999. The exact code of 0999 does not exist.

The CIC of 9999 belongs to TGEC Communications Co, LCC (ACNA is TGX).

Mark Pollan and Caren Schaffner, is there another document you are using to obtain these CICs?

I am trying to confirm the Ameritech LPIC for toll for Doug Lacy in order to run a report on MCI UNEP orders with AIT as the toll provider. Should we be using 0999 to identify AIT all the toll PIC?

Thanks

Cathie
